Smart Integration Global Innovation

Founded in Shenzhen 1999, Cosber is a forward-looking company focusing on providing reliable and innovative solutions for vehicle inspection and repair workshops. As a global technology company, we create added value for our customers by integrating our equipment with IT and network solutions, in order to improve the performance, automated processes and increase overall transparency. The trust which our customer put in our products and services motivates us daily to create high value solutions for them.

COSBER is one of the leading manufacturers of vehicle inspection equipment in China and has global activities in more than 50 countries with offices and production facilities in Shenzhen, Foshan, Shanghai, Nanning, Hangzhou and a subsidiary company in Munich Germany. We employ more than 350 employees, including a strong R&D team consisting of mechanical, electrical and software engineers. Our R&D team together with our high production depth enables us to provide customized products to our customers.

The COSBER's international project team includes experts from the fields of vehicle inspection and workshop equipment. Our technical know-how and market expertise combined with our lean company structures allow to adapt quickly existing products to needs and trends in different markets worldwide.

COSBER New Headquarters

Location

The location network is the foundation of COSBER's growth strategy: New Headquarter & Manufacturing plant in Foshan, Sale and Service Branches in different area of China: Shenzhen, Shanghai, Nanning, Hangzhou, Zhengzhou and also in Munich Germany.

COSBER Germany Branch

New Headquarters

In Foshan, one of Chinese industrial centers, COSBER has established from 2021 its new headquarters. A-10-story building with a total floor area of 60 000 m² will house production facilities, office space, R & D center, training center & showrooms. The modern design of the building reflects the company's commitment to provide innovative solutions for vehicle inspection and New energy application.

PTI

Periodic Technical Inspection - Equipment and turnkey solutions for vehicle inspection centers

HEA

Hydrogen Energy Application - Application & Inspection for the Ultra clean energy- Hydrogen

EVT

Electric Vehicle Test - Inspection and diagnosis tools for the electric powered vehicle

DYNO

Chassis Dynamometer - The precision instrument for car tuners and racing enthusiasts

Inspection Equipments and System For PTI Customer

The COSBER PTI product range consists of a wide variety of high-quality equipment, services and related IT products suitable for different markets and circumstances. Precise, innovative and reliable are the characteristics of the PTI product range. COSBER incorporates the extensive experience and know-how of its Sino-German R&D team into each one of equipment.

From consultation through planning, equipment delivery to commissioning, COSBER offers turnkey solutions for inspection stations worldwide. This holistic approach from a single source allows to create customized solutions according to the needs and requirements of every customer.

**New equipment and concepts for the inspection of EV:
COSBER provides innovative solutions for the vehicle
inspection of tomorrow.**

The wide use of electric vehicles worldwide requires a new & innovative inspection method to guarantee its road safety. In order to tackle this new challenges, COSBER develops the EVT product line. The newest addition to COSBER product portfolio combines the best inspection practices with new inspection methods to address the special needs of electric vehicles.

COSBER works closely together with the Chinese authorities to develop innovative equipment for the coming mandatory inspection of electric vehicles.

Racing Dyno, an exciting machine exposing in car lover's mind

The COSBER Racing Dyno provides exact and repeatable Data of the car's performance. COSBER's high performance chassis dynamometers are all equipped with high quality eddy current retarder to ensure precision and durability.

The COSBER Racing Dyno takes car modification to the next level. It is the ideal equipment for professional car tuner.

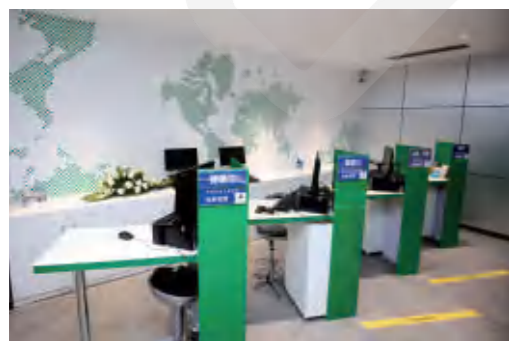

As a clean and efficient new energy, hydrogen energy is becoming a new star of future energy in the world due to its flexibility, efficiency, clean and low-carbon, and wide application.

We are actively exploring Hydrogen application: Hydrogen Fuel Cell materials (MEA, Catalyst), Hydrogen Fuel Cell, Water electrolysis hydrogen production equipment and also various applications, such as hydrogen forklift, hydrogen motor vehicle, hydrogen backup power, etc. We have a great corporate vision of "building green hydrogen plants, caring for environment and reducing carbon emissions".

COSBER PTI Turnkey Solutions - The Gateway to the Motor Vehicle Inspection Market

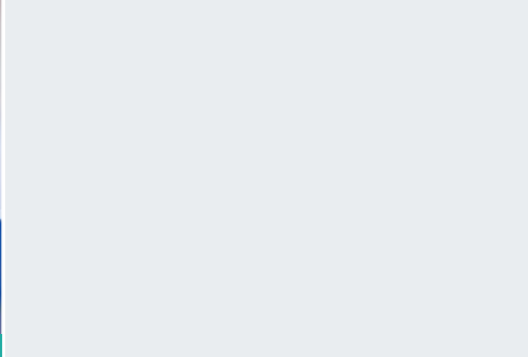

COSBER offers testing organizations with PTI Turnkey Solutions an efficient and uncomplicated access to the Chinese vehicle inspection market and participates in the high potential and future growth of the market.

Benefiting from 20 years of experience and the know-how of our experts, the PTI Turnkey Solution is a comprehensive package consisting of:

- Consultation
- Project Management
- Logistic Services
- After-sales Service
- Equipment installation & Calibration
- Approval Process Management
